SHIP DETAILED DESIGN

HULL DESIGN

FROM CALCULATION TO DELIVERY

The design state is manned by competent ship designers from calculation until its delivery

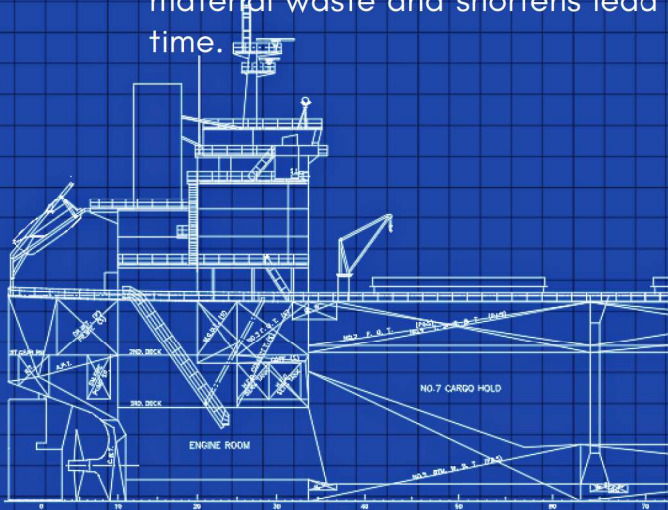

2D & 3D INTERGRATION

TTSP utilizes the 3D software, CADMATIC in developing competitive quality outputs to 2D Plans.

COST EFFICIENT

TTSP gives the best value for our quality Ship Detailed Designs. Our hull design process reduces material waste and shortens lead time.

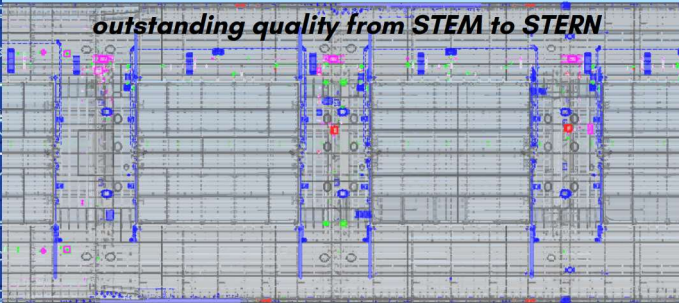

DRAWING PLANS

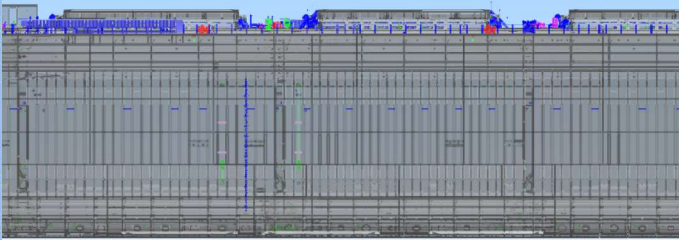

SHIP DETAILED DESIGN

outstanding quality from STEM to STERN

As one of the top design centers within the Tsuneishi Group, TTSP continues to produce high quality detailed designs ranging from its HULL down to its OUTFITTING. Armed with the latest design tools, the company continues to empower her mission of providing the world with our brand of high quality output and technical services.

MODEL

OUTFITTING DESIGN

HIGH PERFORMANCE. LOW FUEL INTAKE.

TTSP incorporates new technologies to unique hull designs to reduce wind resistance and better fuel efficiency

EARTH-LY DESIGNS

To reduce industry's impact on the environment through the constant improvement of our designs.

DESIGNED WITH CREW IN MIND

The safety of the crew is our top priority in our ship designs. Tsuneishi guarantees the safe and convenient operation of our designed ships.
